## ARC BEAM DLL

Mixture of organic acids and buffering inorganic salts

### Properties

Appearance	: White yellowish powder and organic acids flakes
Active Substance	: 98%±2
pH	: 3 ± 0,5 Sol 10%
Shelf life	: 24 months in the original packaging

### Characteristics

- : Completely soluble in water. Deep and strong deliming action eliminates the lime
- : Action without risk of acid swelling
- : Economical in use

### Applications

ARC BEAM DLL deliming agent mainly used in heavy bovine hides.

Gives deep deliming effect without compromising grain fineness and firmness of the produced leather.

The quantity used varies according to the relation of hide thickness and the previous process done before.

Generally big bovine hides fleshed and unsplit 1.5-2 % and lime split hides generally 0.8-1 is enough with the assistance of combining with ammonium sulphate and Sodium metabisulphite.
