

## ARC BEAM DLXC

Highly special deliming agent specially produced very low content of inorganic buffer salt  
amonium sulphate free deliming agent

### Properties

Appearance	: Yellow – white ivory powder
Active Substance	: 98 ± 1 min
Ph Sol 10%	: 3-3.5
Deliming Power Index	: 4-4.2
Power of Lime Solubilisation	: 70-75
Buffering Index	: 26-28
Storage life	: 6 months in the original packaging

### Characteristics

- : Easily but gently eliminates the lime residuals
- : High deliming and buffering Index
- : Eliminates the lime chemically combined with dermal substance
- : ARC BEAM DLXC action is without any risk of acid swelling
- : It can be used low float deliming process
- : It doesn't contain any Amonium Sulphate so deliming is slow and the result and Pelt is tight but completely free of lime
- : There is no risk of overdeliming especially cow leathers.
- : The produced leather is soft and tight fiber structure

### Applications

ARC BEAM DLXC is a compound of mainly based of bicarboxylic acids and some assistance.

ARC BEAM DLXC we prefer to use both for light or heavy hides. Gives deep deliming action without compromising grain fineness and firmness.

Quantity varies in relation of hide thickness and to the washes carried out after Fleshing.

Further information, methods of use and examples are available upon request.
