

## **ARC BEAM WA**

Biodegradable-ecologic, non-ionic poly condensate compounds  
free of solvents

### **Properties**

Appearance :Colorless clear liquid  
Active Substance :30+-2  
pH :8+-0,5 Sol.10% Non-ionic  
Shelf Life :18 months in original container

### **Characteristics**

- \*Fully miscible in water.
- \*Not compatible with vegetable extracts.
- \*Specially for very greaser leathers.
- \*Very stable to hard water.
- \*Free from solvents and phenol derivatives.
- \*It is biodegradable.

### **Applications**

ARC BEAM WA specially designed for degreasing of sheep skins which has high amount of natural fats. ARC BEAM WA

degreasing gives very strong reduction of the natural fats so it avoids any greasy stains on the surface of finished leathers. The quantity to be applied depends on the kind of the leather fat content and the thickness. Suggested quantity on the sheep skins around 4-4,5% on the fleshed weight of calf, goat, buffalo 0,3-0,5% will be sufficient.
